## SEAW Awards Annual Scholarships to Two University Students

Seattle, Washington, September 14, 2011 – The Structural Engineers Association of Washington is pleased to announce that Katie McIntyre and Amy Reinke have been awarded scholarships towards their education in structural engineering. To date, fifty scholarships totaling over \$100,000 have been awarded by SEAW.

Amy Reinke received her undergraduate degree in civil engineering from Seattle University where she was active with Society of Women Engineers and the American Society of Civil Engineers. This fall Amy plans to attend University of Southern California to pursue a Master's degree in structural engineering.

Katie McIntyre received her undergraduate degree in civil engineering from the University of Washington where she was active with the Steel Bridge Team and the Chi Epsilon honor society. Katie plans to attend the University of California Los Angeles to pursue a Master's degree in structural engineering.

*The Structural Engineers Association of Washington (SEAW) is a not-for-profit professional organization of leading structural engineers dedicated to the advancement of excellence in structural engineering through building code advocacy, continuing education, research, emergency preparedness, exchange of ideas, and mentoring. Over the past sixty years, SEAW has pursued issues affecting public safety and professional practice in structural engineering and SEAW members actively participate in the development of building and material codes and standards at both local and national levels.*
