### Program : **Concrete Reinforcing Steel Institute "Economy and Constructability"**

This program discusses the pros and cons of the various types of concrete construction and what can be done to insure they are economical and buildable.

Jim Fullerton is the Northwest Manager for the CRSI and his territory includes Washington, Oregon, Idaho, Montana, Wyoming and 2 Western Canada provinces. Prior to joining the CRSI in 2006, Mr. Fullerton had over 40 years experience in the reinforcing steel industry all the way from a junior detailer to president of a large rebar fabrication company.

Plan to attend and improve your concrete system selection and rebar detailing skills.

### Snow White Paper

Our committee continues to gather information from the various snow related failures our area experienced this winter. Please take a few minutes to fill out the excel spreadsheet that was emailed to you earlier this month. This information is extremely useful to the committee. Our goal is to find commonalities in the types of failures, to allow us to improve our design and construction practices in the Inland Northwest. We have the full support of our local Building Officials in this effort.

Thanks to those of you that have volunteered to assist so far. Please send completed excel spreadsheets to Robert Graper at [rgraper@integrus.net](mailto:rgraper@integrus.net).

We have received the following applications for membership:

Tony Stenlund	Jason Erickson	Anthony Merrell
Derek Brosious	Tony Le	Brent Cornelison
Jeff Mitchell	Todd Barfuss	Jed Druffel
