RSVP to Duke Turner (328-2994) or e-mail at turner@coffman.com by noon, Wednesday, November 11th. SEAW is charged for no-shows, so please plan on attending if you RSVP

Program: Structural Waterproofing by Scott Tyson

Scott Tyson, CSI/CDT, Manager of the West Region (US/Canada) of Grace Construction Products will be presenting an AIA accredited structural waterproofing mini-seminar. Along with a review of standard and advanced principals of waterproofing and the various options available to prevent intrusion and subsequent damage, some of the discussion will focus on solutions available from Grace including:

Bituthene: The original and most often selected self adhesive sheet waterproofing. For over 40 years it has offered protection for below grade and elevated deck applications worldwide.

Procor: A cold applied fluid option as an alternate to the sheet membranes. This product can be spray applied to "green" concrete and provide seamless protection even on complex designs.

PrePrufe: A pre applied weatherable membrane for underslab, blindside / zero lot line situations which aggressively bonds to the concrete for maximum protection. For shotcrete wall applications we now offer the only system designed specifically for this application, the PrePrufe SCS.

FlorPrufe: Similar in function to the PrePrufe providing bonded underslab protection in slab on grade applications.

Perm A Barrier: Both sheet and fluid options for air barrier and air/vapor barrier applications on above grade walls.

Announcements

Reminder: The holiday season is among us already! Please note there will be no December meeting.

In the Works: SEAW is working on establishing a location on the website to post resumes for those who are unemployed, status updates will follow.

Young Members Forum: YMF is active and growing. If interested, please contact the Spokane Chapter YMF Chair, Miles Bullock mbullock@integrus.net.
